

# Quick Start Guide

## Start Here

### **Key2SafeDriving is Easy to Install**

The typical installation takes less than five minutes, and is accomplished in two parts:

1. First, install the Key2SafeDriving™ Activator® in your car.
2. Second, install the Key2SafeDriving™ phone software.

#### Mobile Phone Requirements

- Blackberry 4.5 or above, Symbian S60 3rd or above, or Window Mobile 6.x or above
- Bluetooth
- 8 Mbytes of free storage space
- Texting plan (average user can expect to send roughly 100 messages a month)
- Optional: Internet data plan (simplifies installation)

## 1. Install Activator®

The Key2SafeDriving™ Activator® is designed to be a "Plug and Forget" device. Once installed, you should never need to worry about it again.

### **To install the Activator®**

1. Locate the OBD II port under the dash of your car.
2. Plug Activator® into the OBD II port.

(Note: The OBD II port should be located under the dashboard on the driver's side of the vehicle. It should be within 18" of the front seat. Some vehicles may hide the OBD II port behind an access panel or underneath a coin tray.)

## 2. Install Phone Software

We recommend that a parent do this portion of the installation.

### **To install the Key2SafeDriving™ Software**

1. Download Key2SafeDriving installation package from store.
2. Run the installer.
3. From the sync software that came with your phone browse to C:\Key2SafeDriving, and install the software onto your device. (Common sync software include: BlackBerry Desktop Manager, Microsoft ActiveSync, or Nokia PC Suite).
4. When prompted enter an administrative PIN and phone number.

(Note: The PIN is used to access the administrative features of Key2SafeDriving. The phone number you entered during the installation is the primary contact for emergencies and other notifications. This number should be able to receive text messages.)

## 3. Verify the Installation

### **To verify the Key2SafeDriving™ installation**

Take your phone to the car with the Activator®. Start the car. The phone will start Safe Driving Mode in 30 seconds. To stop Safe Driving Mode simply turn off your car.

## Get to Know Key2SafeDriving™

This section describes how to see some of the features of the Key2SafeDriving™ solution. These options are accessed while the phone is in Safe Driving Mode.

### Manage Profile

1. Select the Options menu in the lower right corner
2. Type the PIN you entered during installation.
3. Select Manage Profile
4. Select Emergency Contacts to change Emergency Contact Numbers. The first Emergency Contact number is also the administrative contact. This number will receive text notifications from the phone.
5. Select Change PIN. This is where you can change the administrative PIN.
6. Exit back to Safe Driving Mode screen by pressing the 'X' in the upper right corner of the screen

### Emergency Calling

1. Tap on the Red Cross or select Emergency Dialing. K2SD will display all emergency numbers including 911.
2. Select one of the optional first or second emergency numbers (not 911). The phone will call that number.
3. Hang up.

*Calls to the phone from either of the optional Emergency Contacts are always permitted through.*

*(Note: If the user calls 911, the Key2SafeDriving will allow all incoming calls from that point until the phone restarts Safe Driving Mode. This feature is to comply with Public Service Access Point (911 emergency service) recommendations.)*

### End Safe Driving Mode

1. Turn off the car
2. In about 30 seconds the phone will drop out of Safe Driving Mode and you will be able to use the phone
